

Registered Certified Backflow Device Testers

All backflow prevention assemblies installed in Byron Township or Gaines Charter Township must be tested on frequencies set by the Cross Connection Department. This testing must be performed by a Plumbing or Mechanical Contactor who is **ASSE (American Society of Safety Engineers) certified tester with a valid State of Michigan Plumbing License.** It is the responsibility of the facility/homeowner to hire as ASSE certified tester and pay for any services rendered.

The companies listed below have met our requirements and are registered to test with the Cross Connection Department. Their test gauge is certified for accuracy, and they will submit your data test results using the web-portal. You may choose to hire a contractor that is not listed below, please verify that the company you hire will test your residential device with a certified test gauge. The Cross Connection Department will also accept device test forms by email, mail or fax. Please call more than one contractor for price quotes and comparisons.

This list is provided as a courtesy and is not intended as an endorsement; the businesses listed below have no affiliation with the Byron-Gaines Utility Authority.
